**Form 1 & 2 High School**  
Kapropita High School

2001 - 2010

## ACHIEVMENTS

### MEST Incubator Tech Program | Class of 2023

MEST incubator is a year long fully funded tech/business program where they take Africans from all walks of life, brings them into one room and help them come up with sustainable tech business startups, through the use of teaching coding, business and communication programs. Getting through the rigorous interview process of the MEST application and getting to be one of the 52 entrepreneurs in tech all across Africa is an achievement that has frankly changed my life. In terms of using my tech skills into functional businesses that would add value towards my society. I also got to advance my community and network on a global landscape.

### Global Goals Model UN | 2019

I had the profound opportunity to join the GGMUN platform as a voluntary delegate where we debated on current world crisis with other delegates and youth leaders from across the globe and came to a consensus together. As a delegate in the platform I gained a lot of skills in Negotiation, Critical Thinking and especially Diplomacy

### Girls Code KE | 2018

An NGO company that promotes tech development within the life of a girl. It promotes a technological culture and embraces the fact that a girl can do whatever she sets her mind on. Girls Code seeks the growth of technology especially in the sector of programming with major emphasis on web development. It holds holiday boot camps of 1 week to teach Highschool girls the basis of code. I contributed to the company as a teacher and a facilitated the smooth running of the boot camp operations. I as well worked as the Director of Operations within the company, so I got to oversee the operations of the company, such as taking meetings with possible sponsors such as Africa's Talking LTD on future strategies concerning building the company and collaborating together

## HONORS

### Winning Zindi Data Science Design Challenge | 2023

**ZINDI** Zindi Africa

UI/UX Design Challenge

This was an international design challenge designed to create a better profile for their platform that would cater towards their different audiences

### Nairobi Hackathon | 2017

**AngelHack** AngelHack, Facebook, Microsoft

Design MVP

Amongst over 200 participants, our team which comprised of only girls was chosen for coming up with the best solution that was doable at the current stage and innovative
